HANUMANTHA RAO VULLI

Data Engineer | AWS | Python | SQL | Java | Spring Boot

Denton, TX | +1 940-594-4797 | vullihanumantharao@gmail.com
Portfolio: https://sunnyvulli.github.io/ | GitHub: https://github.com/Sunnyvulli

PROFESSIONAL SUMMARY

Data engineer with experience supporting AWS pipelines, ETL workflows, relational databases, and Java backend services. MS in Data Engineering, with reproducible portfolio work in data quality and applied machine learning.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, TypeScript

Data: ETL, data validation, SQL optimization, PostgreSQL, Oracle, MariaDB

Cloud and DevOps: AWS EC2, S3, RDS, Lambda, API Gateway; Docker, Jenkins, Terraform

Frameworks and Testing: Spring Boot, Angular, Hibernate/JPA, REST APIs, JUnit, Mockito, Selenium

PROFESSIONAL EXPERIENCE

Data Engineer | PRC Cloud Tech, USA | January 2026 - Present

- Contribute to AWS ingestion and ETL workflows preparing operational data for reporting and analytics.
- Write and optimize SQL, validate reporting data, and help troubleshoot scheduled pipeline failures and AWS backend services.

Data Engineer | Tech Force, USA | September 2025 - January 2026

- Supported AWS pipelines and investigated data-quality issues affecting downstream systems.
- Tuned PostgreSQL and Oracle queries through SQL analysis and indexing; assisted with Jenkins and Docker delivery workflows.

Data Engineer | Infosys Now, USA | April 2025 - September 2025

- Worked on Spring Boot services integrated with AWS EC2, S3, and RDS for structured data ingestion.
- Checked missing and inconsistent records and documented service configurations and data workflows.

Java Full Stack Developer | DBS Technologies, India | July 2022 - May 2023

- Developed Angular features and Spring Boot REST APIs supporting application and database operations.
- Assisted with AWS deployments and Jenkins/Docker automation; participated in sprint planning and code reviews.

SELECTED PROJECTS

Mobility Quality Lab | Python, SQLite, Docker, GitHub Actions

https://github.com/Sunnyvulli/Sunnyvulli.github.io/tree/main/projects/mobility-quality

- Processes 17,379 historical observations with source hashes, semantic validation, transactional loading, and a read-only API; includes 10 passing tests.
- An 84-day backtest measured MAE of 49.77 versus 64.03 rentals/hour for an online weekly-lag baseline.

Applied ML Research Suite | Python, pandas, scikit-learn

https://github.com/Sunnyvulli/Data-Engineer_AI

- Three executed baselines: phishing feature robustness, citation-support triage, and early simulated-transient ranking; includes 33 integrity tests and offline batch scoring.
- Adds open entailment-model and independent feed comparisons; retains failed results and limits. Developed with Codex assistance.

EDUCATION

Master of Science in Data Engineering | University of North Texas, Denton, TX | December 2024

CERTIFICATIONS

AWS Certified Data Engineer - Associate | Oracle Certified Professional: Java SE 17 Developer
